

COVID Vaccine Eligibility

✓ Age 65 and Older

All individuals aged 65+ are eligible for the COVID vaccine.

✓ Under 65 with High-Risk Conditions

If you're under 65, you may still qualify if you have at least one of the following FDA-recognized health conditions:

- Asthma, COPD, or other chronic lung conditions
- Cancer (any type)
- Cerebrovascular disorders
- Chronic kidney or liver disease
- Current or former smoking history
- Current or recent pregnancy
- Diabetes (Type 1, Type 2, or Gestational)
- Heart conditions
- Immunocompromised status (e.g., HIV, cystic fibrosis, organ transplant, immunosuppressive therapy)
- Mental health conditions (e.g., depression, schizophrenia, dementia)
- Obesity
- Physical inactivity
