

Sixty-nine students were enrolled in more than one school, as follows:

- 1 student in BSSP and BSOE
- 3 students in CAPS and BSSP
- 46 students in CAPS and GS
- 1 student in CAS and BSSP
- 3 students in CAS and CAPS
- 1 student in CAS, CAPS, and GS
- 12 students in CAS and GS
- 2 students in GS and BSSP

Total duplicated enrollment at Bethel University for 2011-12 was 6,707. (This counts each student once for each school in which they were enrolled.)

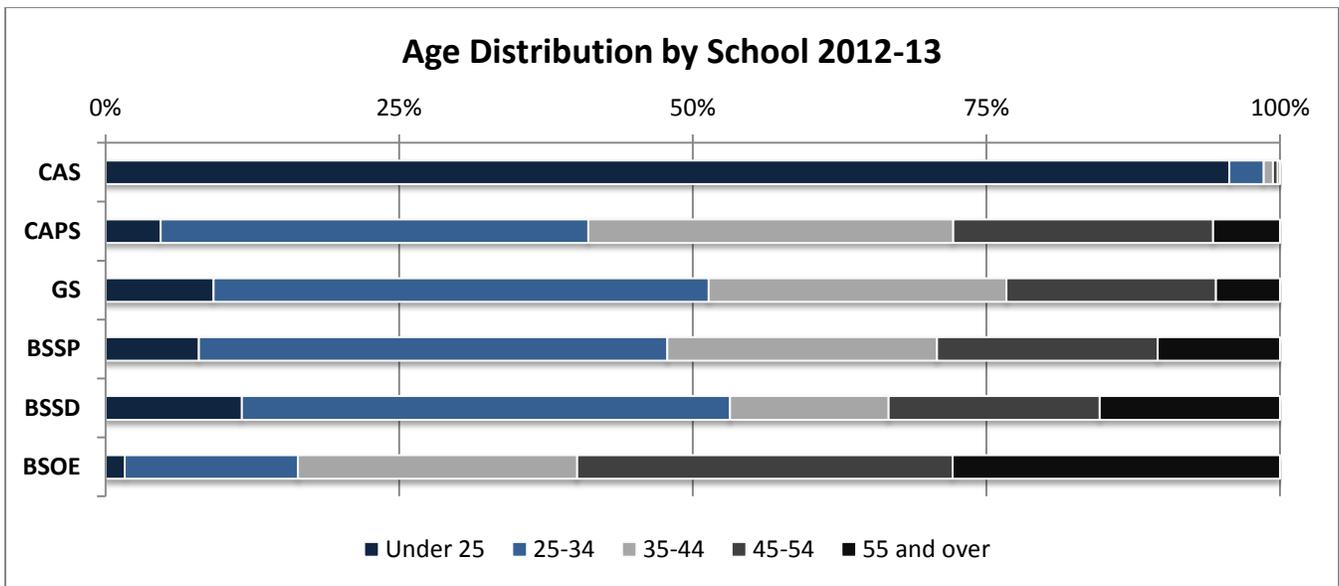

### Gender:

For the fourth consecutive year, the percentage of females inched upward, now approaching 60% of Bethel's total student population (the norm of the previous few years had generally been around 57% to 58% female). The continued decrease in the percentage of male students is driven primarily by lower enrollments in the seminaries, which have historically enrolled more male than female students.

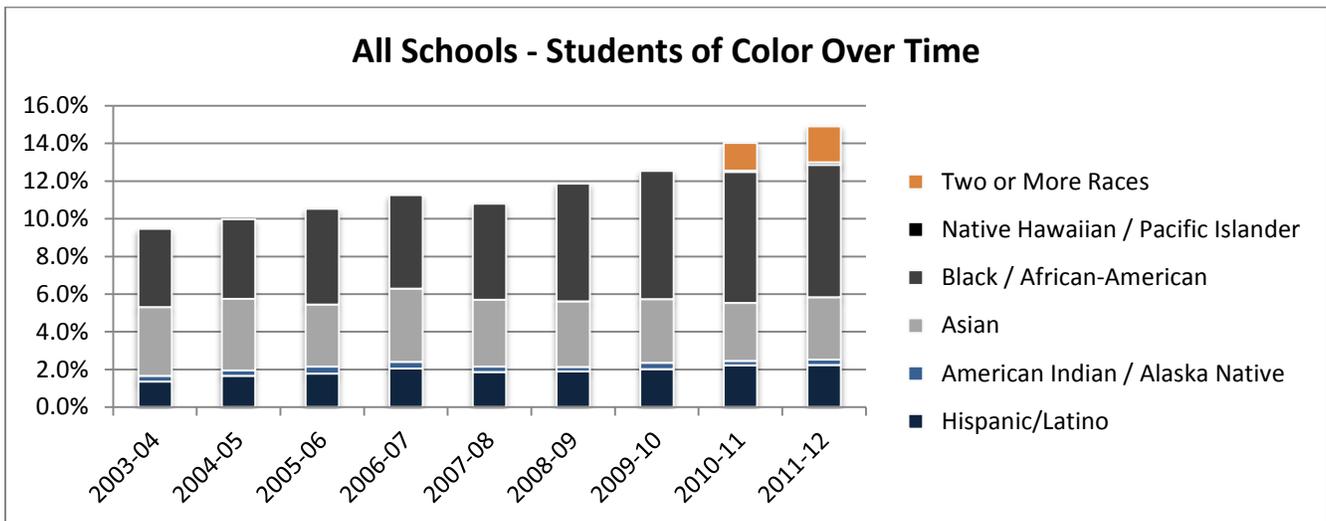

### Age:

CAS continues to maintain a median age of 20, with about 96% of students being under the age of 25. In contrast, ages at BSOE remain disproportionately high, with 60% of students age 45 or older. Median ages for the remainder of the schools remain in the mid-30's, with the median at BSSD falling to 33 (previously 35-37), making it the site with the second youngest population after CAS.

### Race/Ethnicity:

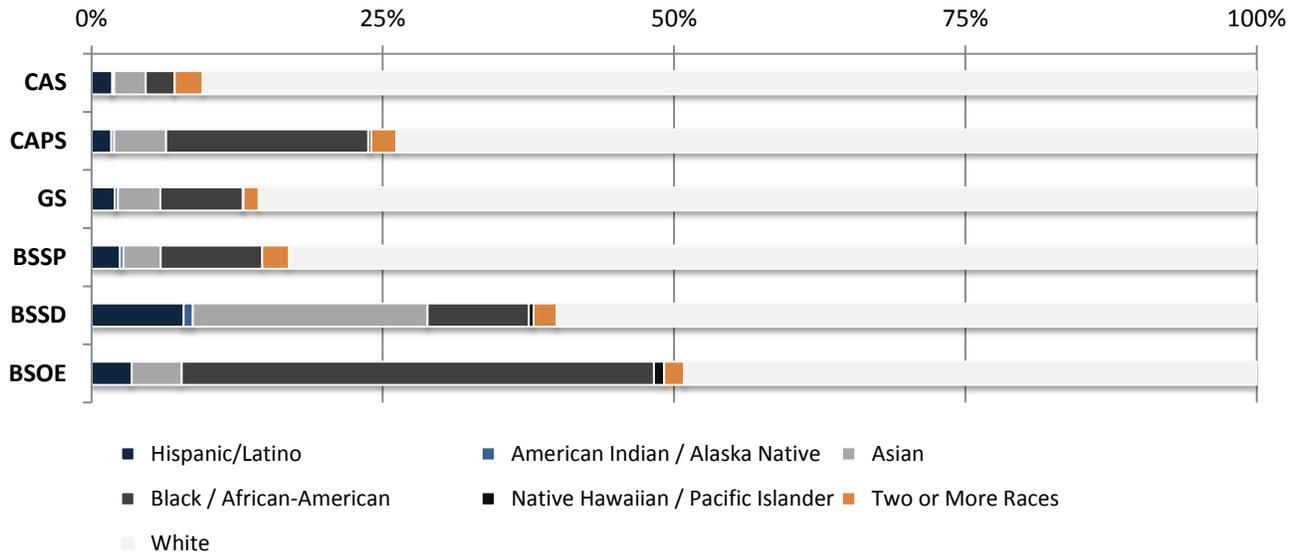

The percent of students of color at all Bethel schools inched up again in 2012-13 to a new high of 15.6% of students with a known race/ethnicity (excluding non-resident aliens).\*

This increase is largely driven by increased racial and ethnic diversity in the graduate school (from 11.9% students of color in 2011-12 to 14.4% in 2012-13). Racial and ethnic diversity also increased strongly at BSSP and slightly at BSSD, while remaining flat at CAS and CAPS. BSOE saw a slight decline in students of color for 2012-13, while still maintaining an enrollment of over 50% students of color.

\* Starting in 2010-11, federal requirements adjusted the way institutions ask about and record race/ethnicity, correcting a prior underrepresentation of Hispanics/Latinos and allowing students to identify themselves as more than one race (now reported as “two or more races”). Due to the transition from the old reporting standards to the new race/ethnicity guidelines, the figures for 2010-2011 and following use a combination of new and old race/ethnicity standards. The new race/ethnicity data has been used when available, but old data has been used if no new data is exists.

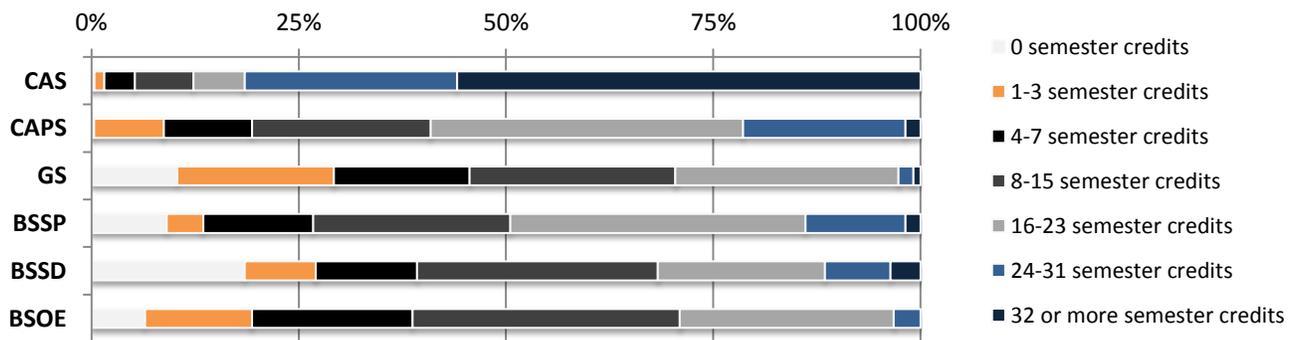

### Race/Ethnicity Distribution by School 2012-13

### Credit Levels:

Total registered credits for the entire university fell about 1% from the prior year even though median credit loads remained flat or increased slightly for each of the six schools of Bethel University (averages loads did dip slightly for some schools).<sup>†</sup> One influencing factor in this decline is that fewer students took 32 or more semester credits (down 3% from the prior year in CAS). Another factor is changes in headcount enrollment, as programs with lower credit densities, in GS for example, have seen increased enrollment, while other higher-credit schools like CAS had slight declines in headcount.

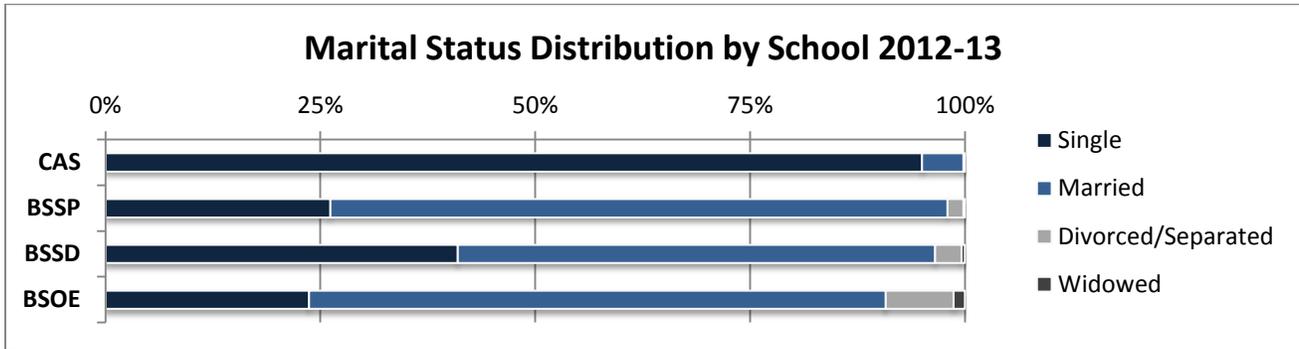

### Credit Distribution by School 2011-12

<sup>†</sup> Note: for comparison purposes, quarter credit hours in the seminary have been converted to semester equivalents.

## Marital Status:

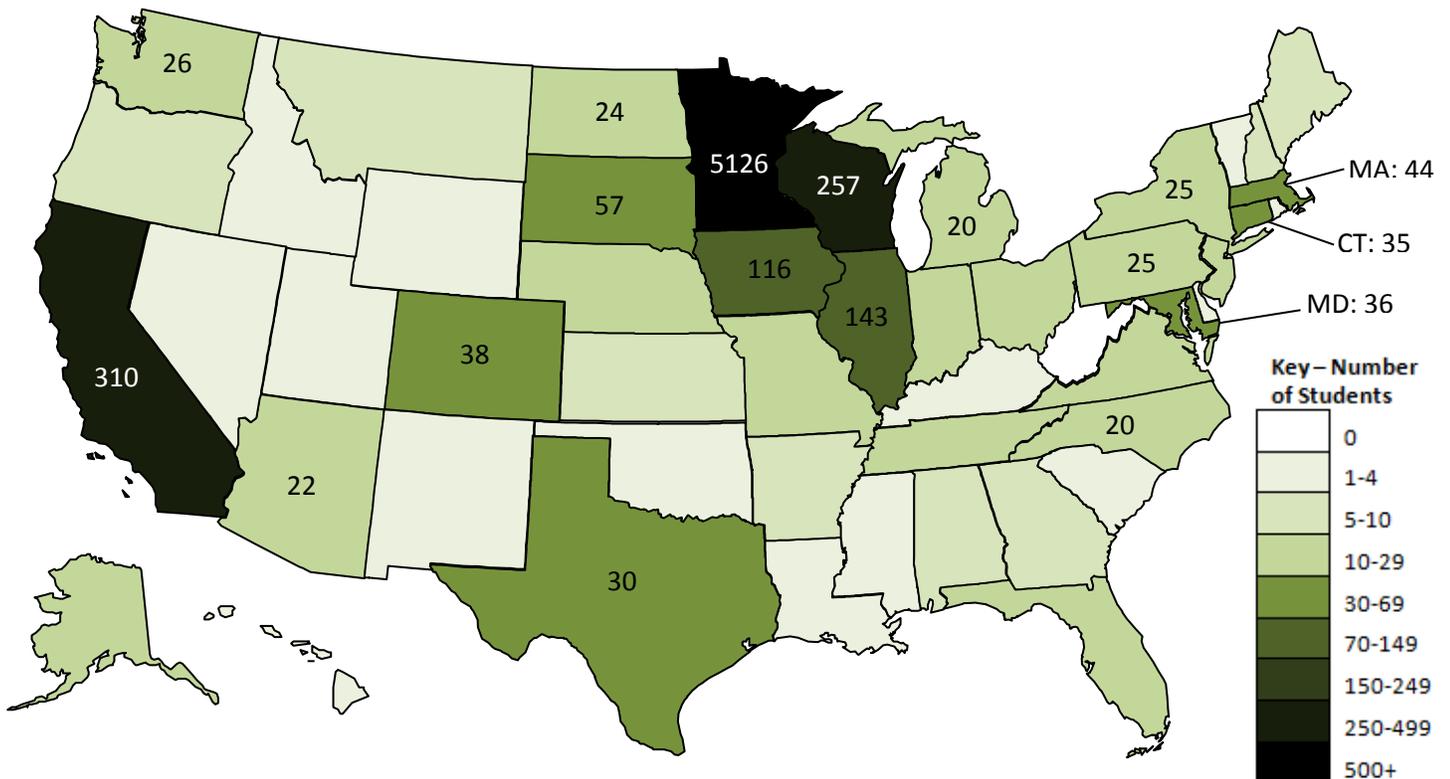

In schools which record marital status for the majority of their students (CAS and the seminaries), there was little change in marital status from prior years. About 95% of CAS students are single, while over 65% of students in the seminary are married. As has historically been the case, marital status has not been asked of many CAPS and GS students, leaving about 75% at an unknown status.

## State and Country:

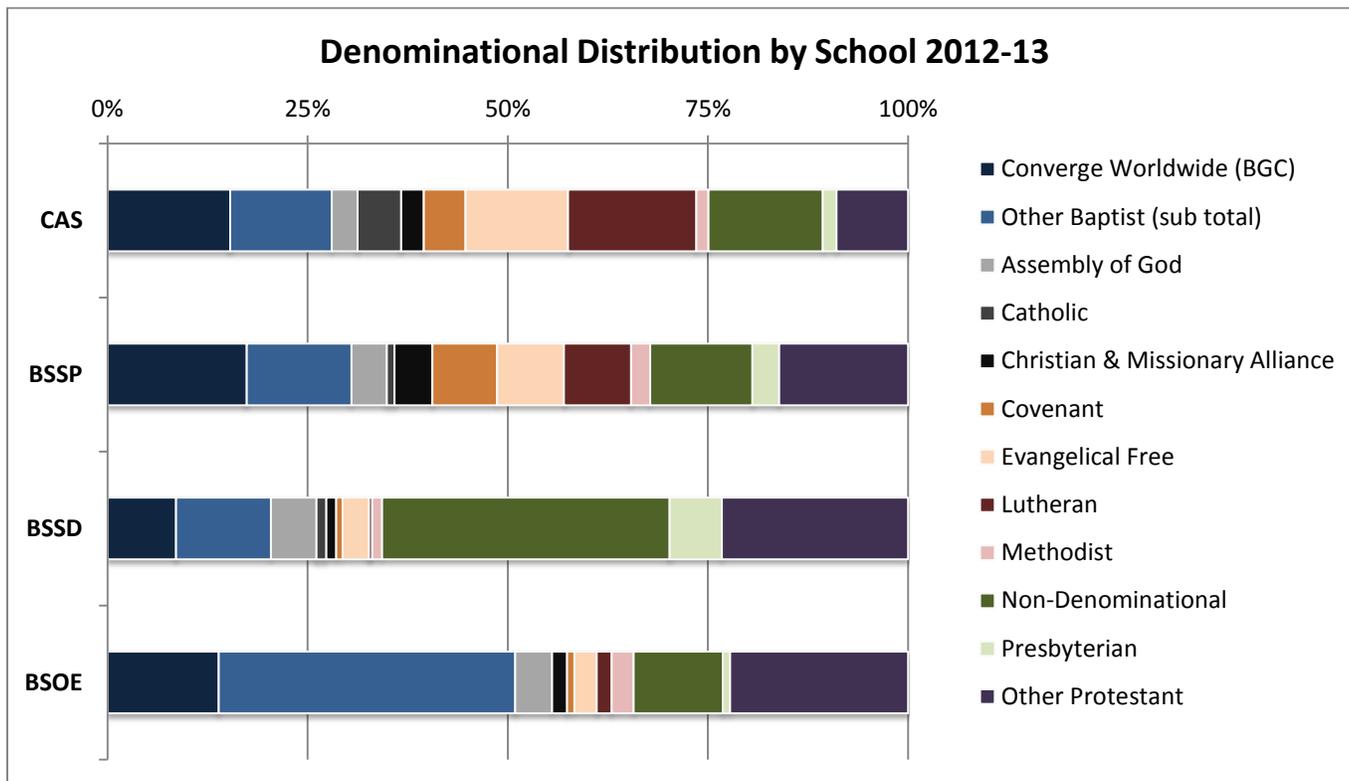

In 2012-13, Bethel University enrolled students from 49 states (all except West Virginia), the District of Columbia, and 31 foreign countries. The state with the largest contingent of Bethel students continues to be Minnesota (over 76% of all enrollment, down slightly for the second year), followed by California (5%), Wisconsin (4%), Wisconsin (4%), Illinois (2%), and Iowa (2%), with similar percentages to prior years in these states.

**Number of Students Enrolled by State – All Schools**

## Denomination:

The percentage of Bethel University students affiliated with Converge Worldwide dropped from 16.6% the prior year to 15.4% in 2012-13, continuing 5 years of the downward trend from 25% in 2007-08. CAS and BSSP have a varied mix of denominations with about 30% of students identifying with a Baptist denomination. Fifty-one percent of all BSOE students identify themselves as a part of a Baptist denomination, down from 52% the prior year. Thirty-six percent of all BSSD students identify themselves as non-denominational, a continued increase from the prior years.<sup>‡</sup>

## Note:

Additional data and graphs for all of the above categories, including longitudinal data back to the 2003-04 academic year, is in a separate Excel document, available upon request.

<sup>‡</sup> Denominational data for CAPS and GS continues to be unreliable as it is not asked of the majority of students, so it is not included in the above summary.

**Appendix – Data Detail for 2012-13:**
