

Final Examination: Requirement

Any exception from the following faculty-authorized requirement must be cleared in advance with the Vice President and Dean:

The school's policy on final exams is that every regular academic course must include a final exam or other final appropriate academic exercise within the final exam schedule. In lieu of a final exam which covers the entire course, the following have been declared to be appropriate academic exercises: a paper due at the time of the regularly scheduled final exam period; a unit test similar to others given during the term which covers only a part of the course; or a required class meeting or academic exercise during the regularly scheduled final exam period. Final exams should not be advanced into the last week of classes because this impacts negatively on student performance in other classes.
